CARE GUIDE

# Looking after your teak.

Reclaimed teak is dense, stable and naturally oily, and it asks for very little: the right cleaner for its finish, a soft broom, and steady indoor air.

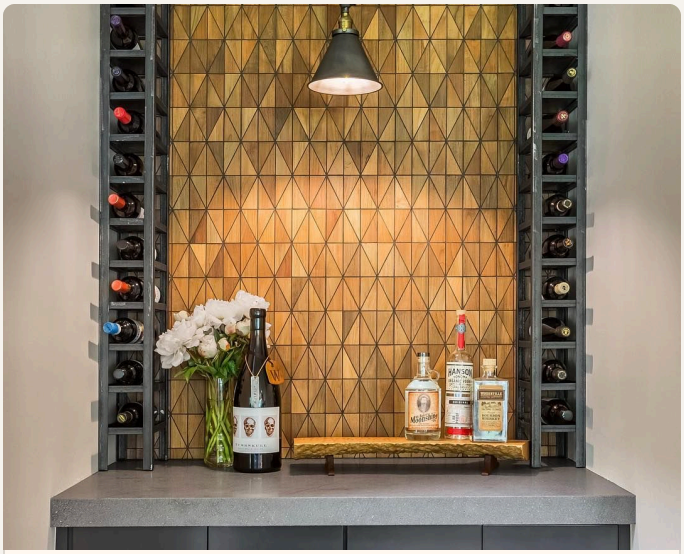
01 · FLOORING & DECKING

## Oil-based finish

Our standard flooring and decking finishes are oil-based. We recommend Rubio Monocoat products.

| | |
|---|---|
| TO CLEAN | Rubio Monocoat Soap |
| TO REFRESH | Rubio Monocoat Renew, to refresh and protect the floor |

Decking outdoors: oil it each season to keep its honey colour, or leave it bare to weather to an even silver-grey.



02 · TILE

## Water-based finish

Our standard tile finishes are water-based. We recommend these cleaners.

| | |
|---|---|
| TO CLEAN | Bona Hardwood Floor Cleaner or Loba Universal Floor Cleaner |
| TO REFRESH | Bona Hardwood Floor Refresher, to refresh and protect the tile |

CUSTOM FINISH?

If your product has a custom finish, ask our sales team for care instructions made for it: (858) 271-9801 · sales@indoteakdesign.com

EVERY DAY

# Six habits that keep it new.

For every IndoTeak floor, deck and tile.

01

## Sweep it soft

Clean regularly with a soft-bristle broom, a dust mop or a slightly damp cloth.

02

## Keep water off

Avoid too much water. Never wet-mop: it can damage and discolour the wood.

03

## Lift, don't drag

Take extra care moving heavy objects, so they don't scratch or gouge the floor.

04

## Mind the heels

Spiked and stiletto heels can dent and damage a hardwood floor.

05

## Keep the air steady

Hold the humidity between 30 and 50 percent, and the temperature between 60°F and 80°F.

06

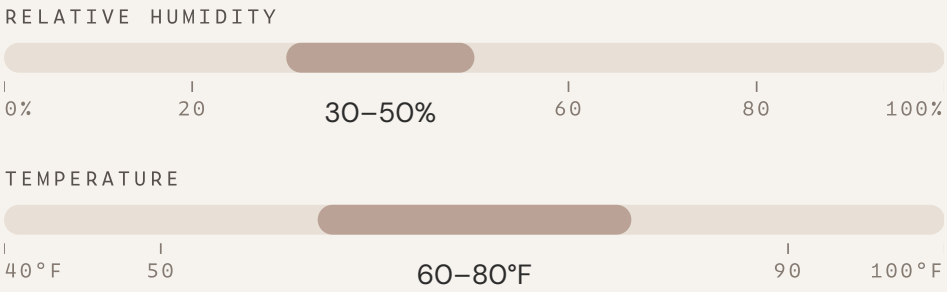
## Leave the HVAC on

Avoid quick swings in temperature or humidity: never turn the HVAC off when you're away for a long time.

INDOOR CLIMATE

# The air teak likes.

Wood moves with the air around it. Keep it inside these two bands, all year round.



QUESTIONS

Not sure which cleaner suits your finish? Our team is here to help.
